Driver's seat

[a] Vehicle height

The maximum height of the vehicle is 2.80 meters. You will find an indication on the side of the steering wheel.

[b] Run Lock option

The Run Lock option allows you to keep the truck engine running even after removing the keys from the ignition.

It can be activated by pressing the button with the same name. Do not activate the Run Lock if the engine is not running, as it could drain the main battery.

[c] Media operation

Step 01: Ensure the ignition is engaged and press the «General Cut Off» and «Sono» buttons located above the driver's cabin.

Step 02: To turn on the Apple TV, press the «Menu» button on the remote control or push the button situated under the screens.

Step 03: To use the soundbar, press and hold the power button on the remote control.

Information about sound system conneion: The driver can play music from the bluetooth of the car, for the production areas the music can be played by connecting your device to the Apple TV. Note that both cannot be playing

Driver’s seat
